London 2014
Jalview Workshop

University College London
15th December 2014

£15 students/£25 non-students
(lunch and refreshments included)

For more information and registration go to
http://j.mp/JVLondon2014

Registration closes: 1st December 2014

Jalview is a workbench for creating and analysing sequence alignments that works with proteins, DNA, and RNA, and can visualise phylogenies, 3D structures, and annotation on the alignment.

In this workshop, learn how to:
- Create, analyse and annotate alignments for publication
- Visualize protein and nucleotide annotation and molecular structure
- Predict secondary structure, disordered regions and functional sites in proteins
- Set up your own virtual bioinformatics analysis server
- Add Jalview to your website
- Extend Jalview for your own needs

Jalview is a workbench for creating and analysing sequence alignments that works with proteins, DNA, and RNA, and can visualise phylogenies, 3D structures, and annotation on the alignment.
